- Bibcock with aluminium T handle and hose-end
- Thread ISO 228
- Finishing nickel-plated
- Temperature range min 0°C - max +95°C

Bibcock suitable for distributing and interrupting fluids that are generally non-corrosive, compatibly with the valve materials. Plumbing, heating, industrial and agricultural sectors are the ideal fields of application.

It's a reduced bore bibcock and the ball seal is guaranteed by two PTFE seats.

The operating mechanism seal features two NBR O-Rings with an internally installed stem and anti-ejection system.

It is advisable to carry out a complete maneuver cycle at least once every three months in order to prevent limescale deposits that could compromise the valve functioning.
