Fitting suitable for distributing fluids that are generally non-corrosive, compatibly with the fitting materials. Heating and HVAC systems are the ideal fields of application. The tightness is guaranteed by two EPDM PEROX O-Rings, particularly recommended with water-glycol solutions, with a maximum glycol presence of 50%. The steel sleeve pressing, carried out with electromechanical tools, ensures a perfect and indivisible crimping to the pipe as well as an excellent resistance to external stress.
