

COMPRESSION FITTINGS FOR PEX-AL-PEX
PIPES

FEMALE BALL VALVE

8641

- Female ball valve with compression end and T handle
- Thread ISO 228
- Maximum operating pressure 10 bar
- Temperature range between min 0°C - max +95°C

Valve suitable for distributing and interrupting fluids that are generally non-corrosive, compatibly with the valve materials. Heating, plumbing and industrial systems are the ideal fields of application, such as high and low temperature heating systems, HVAC, air-conditioning and water distribution. The ball seal is guaranteed by two PTFE seats. The operating mechanism seal features two O-Rings with an internally installed stem and anti-ejection system. It is advisable to carry out a complete maneuver cycle at least once every three months in order to prevent limescale deposits that could compromise the valve functioning.
